66. <mark>Wedding chauffeur</mark>

- <mark>This section should capture details for both hourly booking and point to point bookings.</mark>
- <mark>Replace "Extra message for driver" with a more appropriate phrase.</mark>

A section is needed for multiple service bookings and multiple vehicle bookings. It should include all relevant details,especially if it's for a group of people. Information such as whether all passengers are arriving at the same time or at different times, whether the pickup location is the same or different, and the main passenger's name should be included. Based on this, there should be a logically structured section that supports this type of complex booking.

68. Special event chauffeur booking

In the special event chauffeur section , Under the main types of the event , event types should be displayed as a drop down menu.

69. The fleet vehicles should be displayed in a sliding carousel.

70. The heading on the vehicle fleet page should be replaced with a more professional term.

71. Fleet images should be animated in a sliding carousel that shows each vehicle's image along with its description before transitioning to the next vehicle.

72 Most of the pages are still not functioning , so all pages should be made fully functional.

73. For the 'Why Choose Us' section, more descriptive content should be added. The text should be short yet clearly explain all key points, and it must align accurately with our company's values and services.

74. The images on the both 'our mission'/ "our vision" pages should be changed.

75. When clicking 'Explore More' on the All Services sliding page, not all services are appearing. This needs to be fixed so that all available services are properly displayed

76. The All Services sliding window should animate automatically without requiring cursor clicks. The sliding animation should start automatically when the user scrolls to that section of the page.

77. On the 'Our Services' page, the map should be updated to display countries and cities. When the user moves the cursor over the map, the corresponding service locations should appear.

78. Heading should be change in fleet page

79. A filter option is needed on the Fleet page to allow filtering by country, city, vehicle name, model, passenger count, and other relevant criteria.Need sliding window for this page.

80. Before navigating to the vehicle description page (i.e., before going to the main page), a popup with a brief description should appear on the overview page when the mouse hovers over the vehicle image.

81. On the Testimonial page, the country list filter, dropdown should include all available country options. And 'all' option also in the service type filter need to be include all the types of services in the dropdown list

82. Access should be granted to all service partners to join through the 'Become a Partner' section, including individual service providers, supplier companies, minibuses, coaches, and all other services we offer. Also, the section title should be changed to 'Become a Partner with Us' to reflect that it is not limited to chauffeur services.

83. The 'Become a Business Partner' section should provide access based on country and city. The page should be divided into categories such as Corporate and Individual clients, which are further subdivided into subcategories. There should be both typing (text input) and dropdown options to select the client category. Based on the selected category, appropriate forms should be displayed to enter the required details.

84. The 'Explore All Around the World with Us' page should feature a sliding window displaying the best images highlighting authentic attractions based on the country and city. Additionally, include a prominent 'Register Now' button on this page.

85.The Contact Us page should include all contact details: location with a map, all email addresses, WhatsApp number, phone numbers, social media links, a live chat option, and any other relevant contact information. All these details should be clearly displayed.

86. The Location section should provide options based on country and city

87. Need to add currency options, and the site language should automatically change according to the selected country using an AP

Note: The landing page is still not functioning properly. At this stage, it is not even possible to perform test bookings for the Chauffeur service. Most sections of the landing page are either incomplete or not working as expected.

Add the provided details to the service descriptions for each service.

We kindly request you to thoroughly review the landing page documentation and the UI/UX design documents we provided earlier. Please ensure that all required features and functionalities are implemented as outlined.

Please don't waste time this time. Make sure to add all the mentioned details as soon as possible.
